

Jump to One

**Printing for  
Professionals**

# All-in-one large format color system

Don't waste a bit of valuable space. Jump to one — one large format multifunction system for all your color and black & white print, scan and copy jobs — the Océ ColorWave® 300 multifunction system. An optional top delivery tray saves even more space by neatly collating and stacking your documents.

- **One for all** — Print, copy and scan all your color and black & white large format technical documents on one system. Plus get additional flexibility by printing from and scanning to a USB® flash drive.
- **One that saves** — Save on floor space and cost by replacing multiple printers and scanners with a single system for both black & white and color. The top delivery tray means no extra table needed to collate prints.
- **One for tomorrow** — Get the productivity of a conventional black & white system without compromising on quality and throughput for color applications.

Check out what a jump to one can do for your organization.
